Objective

Computer Science postgraduate and AI Engineer with skills in Python, FastAPI, SQL, and backend development. Experienced in AI/ML research, deep learning, and software development, with a strong foundation in problem-solving and building reliable software solutions.

Education

Cochin University of Science and Technology (CUSAT) — Kochi, Kerala
M.Tech — CS & Engineering, Data Science & AI | GPA: 8.8/10 — *Aug 2024 – Apr 2026*

Government Engineering College, Idukki — Idukki, Kerala
B.Tech — Computer Science & Engineering | GPA: 8.04/10 — *Nov 2020 – Jun 2024*

Experience

Piramal Finance — Bengaluru, Karnataka
AI Engineer (Third-party payroll: Talisma HR Solutions Pvt. Ltd.) — *Oct 2026 – Present*

- Working on AI application development using **Python** and **FastAPI**, with a focus on building backend services.

Indian Institute of Technology Madras — Chennai, Tamil Nadu
AI/ML Research Intern — *Dec 2025 – May 2026*

- Developed a custom **ResNet1D** model in PyTorch, achieving **99%+ accuracy** on the CWRU benchmark.
- Compared five signal representations to optimize model performance across operating conditions.
- Built an end-to-end PyTorch pipeline for preprocessing, transfer learning, and evaluation.

Open Source Contributions

- **PatchPilot** | PRs – Developed a feature-based severity ranking pipeline and evaluated model performance as part of an open-source production workflow.
- **localmind** | PR – Developed a REST API endpoint for cloning chat sessions while preserving conversation history.
- **Algo-Infinity-Verse** | PR – Developed an interactive web page using HTML, CSS, and JavaScript, including visualizations and coding exercises.
- **Wagle MCP** | PR – Developed Pytest test cases for CLI workflows to improve validation and reliability of command execution.

Projects

TalentHire-AI | ***FastAPI, React, OpenAI, Qdrant, RAG, PostgreSQL*** | **GitHub** — *June 2026*

- Developed a full-stack recruitment application using FastAPI REST APIs, React, and PostgreSQL for resume analysis and candidate evaluation.
- Designed PostgreSQL database schemas and data pipelines for storing parsed resumes, candidate scores, and evaluation reports.
- Integrated third-party APIs and RAG-based processing for automated candidate matching and interview question generation.

Predictive Human Activity Modeling | ***PyTorch, GAT, BiLSTM, PyG*** | **GitHub** — *June 2025 – March 2026*

- Achieved **98% activity accuracy** and **0.93 macro F1** using a hybrid GAT + BiLSTM architecture with activity-conditioned time prediction heads across smart home sensor streams.
- Predicted time-to-next-activity with **MAE of 10–13 minutes** via quantile-based discrete time binning, stabilizing prediction over skewed inter-activity intervals.

Technical Skills

Programming Languages: Python, Java, SQL, JavaScript, C

Software Engineering:OOP, Data Structures & Algorithms, SDLC, Git, GitHub, Testing, Debugging

Backend & APIs: FastAPI, REST APIs, API Integration, Backend Development

Cloud & Development Tools: AWS (EC2, IoT Core), Docker, Linux

Databases & Data Processing: PostgreSQL, SQLite, Oracle Database, Pandas, NumPy

AI & Machine Learning: PyTorch, TensorFlow, Scikit-learn, NLP, LLMs, RAG, LangChain, Qdrant, Hugging Face Transformers
